## **DETAILED ACTION**

Page 2

## Remarks

1. Applicant's RCE filing on 12/6/2004 is acknowledged. Claims 1-36 and 64-75 are pending in the application.

## Allowable Subject Matter

- 2. Claims 1-36 and 64-75 are allowed.
- The following is an examiner's statement of reasons for allowance:

  The prior art of record, Cobbley et al. (US 2002/0068379), teaches a related art, comprising:
  - a lead frame 112 comprising a plurality of lead fingers 128, a plurality of interconnect bonding sites (i.e. the opposite portion with respect to terminal bonding sites 138) on the lead fingers 128 (Fig.5), a plurality of terminal bonding sites 138 in an area array and at least one bus bar 132 in the area array;
  - a semiconductor die 110 comprising a circuit side (i.e. front face 114 of the die 110),
     a plurality of die contacts 116 (i.e. bond pads) on the circuit side; and
  - a plurality of interconnects 130 (i.e. bond wires) bonded to the die contacts 116.

In contrast, Cobbley et al. at least neither teach nor suggest that a plurality of terminal bonding sites on the top portions on the second surface (claim 1), wherein the second surface is opposing to a first surface; a plurality of terminal contacts attached to terminal bonding sites (claim 1); a semiconductor die having a back side attached to leadfingers on a first side and substantially covering a bus bar and an encapsulant encapsulating a die, interconnects and a leadframe (claim 5); a semiconductor die comprising a circuit side, a plurality of die contacts on

Art Unit: 2823

the circuit side and a back side attached to a leadframe and a plurality of terminal contacts on terminal bonding sites (claim 14); a plurality of terminal bonding sites on the leadfingers on the opposing second side in an area array (claim 20); a semiconductor die having a back side attached to die mounting side and a leadframe comprising a plurality of leadfingers having tip portions configured to form the die mounting sit on a first side (claim 27); and a plurality of terminal bonding sites on an opposing second surface of leadfingers in an area array and a semiconductor die back bonded to the leadfingers substantially covering a bus bar (claims 64 and 70).

Therefore, the instant invention is neither anticipated nor rendered obvious over the prior art of record.

- 4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
- 5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Hsien-ming Lee whose telephone number is 571-272-1863. The examiner can normally be reached on Tuesday-Thursday ( $8:00 \sim 6:00$ ).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Olik Chaudhuri can be reached on 571-272-1855. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
